

Blue Valley Bluegrass Blend

This blend of elite Kentucky bluegrasses is an excellent option for those looking to overseed fairways, sports fields, parks, and home lawns. It is also suitable for establishing new lawns or reseeding existing ones that were initially established by sod. The bluegrass types used in this mix offer a very dark green color, improved drought and heat tolerance, and can handle the stresses of multiple management levels. The genetic package is designed to endure high wear and traffic levels, regardless of the climate. It can be mowed as low as ½ inch and has a dense growth habit that naturally crowds out Poa annua and other weeds.

MIX CONTAINS:

100% Elite Kentucky Bluegrasses

Seeding Rate:

Seed @ 3-4 lbs per 1,000 sq ft
Overseed @ 1-2 lbs per 1,000 sq ft

Establishment Rate:

Germinates in 14-28 days under ideal conditions
Fully establishes in one growing season

Characteristics:

Dark green & fine textured
Excellent stress & disease package
Winter Hardy

Light/Soil Requirements:

Performs best in full sun or light shade
Performs well on many soil types

*Coated with Xalt. Xalt Contains:

Nutrients and L-Amino Acids that stimulate root growth.
Water Absorbent Polymer that holds moisture close to the seed for germination.
Apron® XL Fungicide protection from seedling diseases.

*Formulations and Varieties are subject to change without notice
