

# Triple Star Blend

This combination of elite perennial ryegrasses is an excellent option for overseeding fairways, sports fields, parks, open spaces, and existing lawns. The entire genetics package can withstand high wear and traffic levels across various climates. It can be mowed as low as 3/16 inches and establishes quickly, out-competing *Poa annua* and other weeds. Triple Star contains very high levels of viable endophyte, which enhances its resistance to several important insects such as billbugs, sod webworms, chinch bugs, armyworms, and aphids. The presence of the endophyte also contributes to improved stress tolerance, better summer survival, enhanced fall recovery, and reduced weed invasion.

## MIX CONTAINS:

100% Turf Type Perennial Ryegrass

## Seeding Rate:

Seed @ 5-6 lbs per 1,000 sq ft  
Overseed @ 2-3 lbs per 1,000 sq ft

## Establishment Rate:

Germinates in 7-10 days under ideal conditions  
Fully establishes in one growing season

## Characteristics:

Fast germination  
Dark green & fine textured  
High levels of endophytes  
Superior disease resistance

## Light/Soil Requirements:

Performs best in full sun or light shade  
Performs well on many soil types
