

Boulevard Mix

The Boulevard mix is designed for soils with high pH and soluble salt levels. Compared to other turf species, it exhibits good tolerance to salty conditions. It is a versatile grass that grows well in full sun or light shade and can withstand heat and drought stress. Additionally, it has great disease resistance. The Boulevard mix is an excellent choice for street medians or other adjacent street areas where road salt is a factor.

MIX CONTAINS:

20% Turf Type Perennial Ryegrass
25% Fult Alkaligrass
25% Creeping Red Fescue
30% Turf Type Tall Fescue

Seeding Rate:

Seed @ 5-6 lbs per 1,000 sq ft
Overseed @ 2-3 lbs per 1,000 sq ft

Establishment Rate:

Germinates in 7-21 days with proper moisture
Fully establishes in one growing season

Characteristics:

Medium green color
Medium texture

Light/Soil Requirements:

Performs best in full sun or light shade
Performs well on many soil types
