

Detention/Wetland Mix

This is a good mixture for areas that receive periodic flooding or have a high water table. Seeding Rate: 10lbs/acre.

MIX CONTAINS:

45% Reed Canary grass

Cool season bunchgrass with germination in 14-21 days.
Grows 20"-40" tall, thrives best in moist bottomlands on finer textured soils.

25% Improved Meadow Brome

Cool season bunchgrass with germination in 10-14 days.
It can grow 2 - 6 ft in height when irrigated.

25% Garrison Creeping foxtail (coated)

Cool season sod-former with germination in 10-14 days.
Winter hardy, recovers quickly from grazing, palatable to all classes of livestock.

5% Climax, Timothy

Cool season bunch with germination in 7-10 days.
Grows 20" to 40" tall, thrives on rich, moist bottomlands and finer textured soils.
