

Douglas County Perm Mix

The Douglas County Permanent Drill mix is an excellent reclamation option for those looking for a low-maintenance planting, especially near metropolitan areas. It includes cool and warm-season grasses and bunch and sod-forming varieties that are adaptable to a range of soil types. This unique combination also makes it a very drought-tolerant choice, perfect for areas that may experience periods of dry weather. Overall, this mixture offers a versatile and durable option for those enhancing their natural areas. Drilled Seeding Rate: 11 Bulk lbs./acre

MIX CONTAINS:

10% Big Bluestem

Warm season bunch/sod forming grass with germination in 14-21 days. It is a tall grass, reaching a height of 6 feet on most sites when left un-grazed.

10% Indiangrass

Warm season bunchgrass with germination in 21-28 days. It can grow 3-5 feet tall. Grows best in deep, well drained soils.

10% Switchgrass

Warm season sod forming grass with germination in 21-28 days. It can grow 3-5 feet tall. Tolerant to poor soils, flooding, and drought.

10% Sideoats Grama

Warm season bunch/sod with germination in 14-21 days. A medium sized perennial 15-30 inches tall and it is adapted to most soil conditions.

10% Western Wheatgrass

Cool season sod forming grass with germination in 14-21 days. Grows 12-36 inches tall and adapts to most disturbed soils.

10% Blue Grama

Warm season bunch/sod grass with germination in 7-10 days. Will grow 10-20 inches. Has good drought and fair salinity tolerances.

10% Thickspike Wheatgrass

Cool season sod forming grass with germination in 21-28 days. Grows 12-36 inches and has extensive rhizomatous root system.

10% Prairie Sandreed

Warm season sod forming with germination in 21-28 days. Grows 24-72 inches tall. Prefers sandy sites, drought tolerant and winter hardy.

10% Green Needlegrass

Cool season bunchgrass with germination in 21-28 days. Grows 18-36 inches tall and prefers medium to fine textured soils.

5% Slender Wheatgrass

Cool season bunchgrass with germination in 21-28 days. Grows from 24-30 inches tall and has very short rhizomes.

5% Streambank Wheatgrass

Cool season sod forming grass with germination in 21-28 days. Will grow 12-36 tall, drought tolerant and commonly used for reclamation.
